

FOR IMMEDIATE RELEASE

Television Personality Ronny LeBlanc Launches Kickstarter for Interdimensional

Documentary Exploring the Connection Between UFOs, Bigfoot, Consciousness and the Unexplained

Acclaimed researcher, bestselling author, and star of Discovery's Expedition Bigfoot invites the public to help fund one of the most ambitious investigations into anomalous phenomena to date.

LEOMINSTER, Mass. — July 20, 2026 — Television personality, bestselling author, and researcher **Ronny LeBlanc** has officially launched a Kickstarter campaign for *Interdimensional*, a feature-length documentary that explores one of the most compelling questions in modern anomalous research:

What if UFOs, Bigfoot, paranormal encounters, and consciousness are all connected?

Known for his work on Discovery's *Expedition Bigfoot*, Travel Channel's *Paranormal Caught on Camera*, Discovery+'s *Conjuring Kesha*, and numerous appearances across television, podcasts, and live events, LeBlanc has spent nearly three decades investigating extraordinary experiences reported by thousands of eyewitnesses across North America.

The documentary builds upon the research presented in his latest book, *Interdimensional: Consciousness, Cryptids and the Hidden Architecture of Reality*, expanding the investigation through new field expeditions, scientific analysis, expert interviews, and emerging technologies.

Unlike traditional paranormal documentaries that focus on a single mystery, *Interdimensional* examines whether seemingly unrelated phenomena may represent different aspects of a larger, interconnected reality.

The film will feature investigations at documented hotspots, interviews with researchers and eyewitnesses, and collaboration with leading voices studying consciousness, environmental anomalies, and unexplained experiences.

Among those collaborating on the project is physicist and engineer **Dr. Jim Segala**, whose research has focused on measuring environmental and physiological changes associated with reported anomalous experiences using advanced instrumentation. His work introduces a scientific framework for examining reports that have traditionally existed outside conventional research.

“Our understanding of reality is changing,” said LeBlanc. “Over the past several years we’ve seen increasing scientific interest in consciousness, renewed public discussion surrounding unidentified anomalous phenomena, and growing willingness to examine experiences that millions of people have reported for decades. This documentary asks whether there is a deeper pattern connecting these mysteries—and whether we finally have the tools to investigate them in a meaningful way.”

The Kickstarter campaign will help fund:

- Field investigations across multiple documented hotspot locations
- Advanced environmental data collection
- Scientific collaboration and analysis
- Professional cinematography and post-production
- Interviews with researchers, witnesses, and subject-matter experts
- Distribution of the completed feature documentary

Supporters can choose from a variety of exclusive rewards, including digital access to the completed documentary, signed editions of *Interdimensional*, collectible merchandise, behind-the-scenes updates, virtual Q&A sessions, producer credits, and unique investigation experiences.

With just over two weeks remaining in the campaign, LeBlanc is encouraging supporters, podcast hosts, journalists, researchers, and anyone interested in the future of consciousness research and unexplained phenomena to help spread the word.

“This project isn’t simply about proving or disproving extraordinary claims,” LeBlanc added. “It’s about bringing together evidence, science, technology, and firsthand experiences to ask better questions. Whether someone approaches this topic as a skeptic, believer, or simply curious observer, I believe this conversation deserves thoughtful investigation.”

The Kickstarter campaign is now live.
